

TEACHERS

By Audrey Hlembizky

A Teacher's mind is filled with the wisdom of English, science, history and math,
They will give you lessons, tests, and set you on the right path.

When you doubt yourself they will remind you how special you are,
And whenever you need guidance a teacher is never far.

The greatest of teachers will open your mind,
they will empower your thoughts to discover and find

Your curious spirit that lives inside of you,
A magical creation that is powerful and true.

From your first day of school to graduation day,
A teacher will hold your hand and guide you along the way.

Just like you, a teacher is unique with their own teaching style,
Some are silly or serious while others will brighten your day with their beautiful smile.

A teacher's heart is filled with so much courage and grace,
they dedicate their life to developing all people within the human race.

They are one of the reasons why we see planes, buildings and art,
For they were the ones that you shared your first dreams with right from the start.

When you say I want to be a doctor, an astronaut or a hip hop dancer,
They create the plan, help you focus and inspire you to see the answers.

A teacher was born with a divine and powerful light
To show us the way and educate our lives for it is our birthright.

For we all have a say in how the future will go,
to live our dreams and discover all there is to know.

Our teachers make it possible to learn, lead and live,
For that, we are so grateful for all that they give.

There are moments in life we'll remember like the anticipation of a new release of a great movie feature,

And when we accomplish great things,
there is nothing more memorable than the heart and soul of our favourite kind teacher.
